

We first came across this small family run firm when we needed some BP stickers for a Velosolex can. Our first order was here in 48 hours and the stickers were just what we wanted. A really good quality made product. To be honest we spent about 2 hours just going through their website looking at the period sticker selection and marvelling at the range. Period BEA or BOAC stickers, no problem. The next occasion we used them was when we needed some French flags for the Mobylette again here on the doorstep in 48 hours. Since then they have been our go to company for everything from a Russian star to mod pendant. If you need a vintage sticker of any sort or a bit of period decoration then these are our go to people. Apart from the standard range they are able to do one of and custom jobs. We hope soon to be able to get them to make the Riga stickers.

Selection of their stickers
